

CLM-ml-jax: gradient verification — 7 active parameters ($\partial \overline{\text{GPP}}_{\text{day}} / \partial \alpha_i$)
 Medlyn stomata · CHATS7 · 1 May 2007 · GPU · reverse-mode AD vs central FD (eps=1e-4)

(a) AD vs finite-difference gradients

(b) Gradient accuracy
 (PASS parameters only)

$p = 10$ atmospheric / physiological parameters
